

RUQYA AND MEDICINE

BISMILLAH ARRAHMAN ARRAHIM

Sorcery and jinns cause many health problems. These diseases are mystical and do not follow natural rules known by medicine. It can be unexplained pains, known diseases but with abnormal start, unexplainable diseases which have only been observed, named and classified. Medical treatment is not efficient for mystical diseases but can somehow reduce the symptoms.

1 Ulcers, digestive problems

Eaten sorcery consists of drops put in food and drink, then get reconstituted like glue and sticks on the stomach or the intestine. This can be anywhere from the esophagus until the anus. The body detects a foreign body and tries to eliminate it. This causes heartburns which can become ulcer, eventually with bloating, constipations, diarrheas, and can go to hemorrhoids, Crohn disease or cancer.

2 Psoriasis

Pimples, eczema or scars appear on the body most of the time on the legs, sometimes with itching, purulence, bleedings, then grow or move. There is no efficient treatment or valid explanation. This disease is only due to a physical contact with sorcery, most of the time the person walked on it. When it comes on the head it can cause loss of hair, and in the mouth it can create wounds.

3 Open wounds

This is a phenomenon challenging all medical knowledge: wounds appear spontaneously, sometimes after a small choc or an animal bite. These wounds get deeper and spread sometimes until the bone and last for years, resisting all therapies. A disease only due to sorcery and jinns.

4 Keloid

After a small cut, the person develops a big scar which does not go. With years his body gets more and more scars. It is said that it is peculiar to African people, it's rare, with various forms, all that we see is that cells reproduce while healing.

5 Tuberculosis, « coco », sickle cell disease, zona, typhoid fever

Many diseases unknown in the Western world and several patients we received and who had sorcery got healed. For sickle cell disease, for any patient we get, the dins say it is a purely sorcery illness, and his symptoms will disappear with the treatment but we did not send them for new blood test to check the changes.

6 Erectile dysfunction

Medically, this can be caused by diabetes, strong antidepressant, medicine for severe illnesses like cancer, or otherwise by psychological factors: but there must be a serious deception, frustration, anger, disgust or traumatism for a man not to be able to have intimate relation with his wife or a woman. Especially if he loses his erection when going to a woman, or he can have relation with one woman and not another, it becomes clear that the problem is not medical.

7 Sterility

We had many women who became pregnant after our treatment; we have a high rate of success in this field. Most of them went through medicine: for some of them everything is normal; for others there were fibromas, blocked fallopian tubes or tired ovaries; others did IVF. There is no medical explanation for a woman's sterility whose cycle normally works. Note that this sorcery often comes with painful menses, and sometimes pain in ovaries even outside the menses. We also have cases of man sterility, but is rarer because in the logic of sorcery the woman is the main target. But some men with no or few or not mobile enough spermatozoid, this fact has no explanation nor solution. Sometimes pregnancy occurs but the embryo does not survive.

8 Kidneys failure, hemophilia

Unfortunately, it is possible to cause almost any health problem with sorcery. Even if the disease is known, but its start is unusual, and these diseases have no treatment, beside stopping its spreading, limit its effects or replace the deficient organ. When we remove the sorcery, the disease may disappear itself (kidney failure) or continue because it is a natural process that started (cancer).

9 Mental disorders, madness

How can a healthy person suddenly become mad? Unless the person had a serious emotional choc, this is totally incomprehensible. The same for behavior disorders: fear, depression, anger and being aggressive, loss of concentration, are not comprehensible, unless the person had traumatizing painful experiences. During a conference with a psychiatric it appeared that his patients have exactly the same symptoms as ours: we are treating the same people except that they don't have explanation about the origin, functioning and evolution of the disease, they don't expect recovery but just stabilization. By God's grace we have many healed people, but madness treatment is often long: you must persevere until the patient gets his senses back.

10 Disabled children

High fever during pregnancy can « burn » the fetus's brain and cause disability to the child, 21 Down's syndrome makes mentally and physical disabled children. Toxic contamination to the parents can produce disabled babies. When magic is done to the mother, it can seriously affect the child, especially if the magic is done to spoil the child or prevent maternity. In that case, our treatment will bring some improvement such as starting to sit, to speak or to walk, but we only expect a complete recovery if the child was healthy before and got sick. For children born with their disability, it is irreversible but we treat the mother so the next children will not be affected.

11 Pains, heaviness and paralysis

Sorcery and jinns can cause persistent pains all over the body. These pains can prevent the person from studying or working with no obvious physiological cause. Sometimes it can be heaviness in a limb and a weakness, and sometimes, partial, half paralysis of the body or the face. Headaches can be due to lack of drink: make sure the person drinks enough. Pain in the bottom of the back can be due to physical activity; if it's the case, advise the person to do abdomens and gymnastic because its strengthen the back and improve resistance to efforts.

Others criteria of sorcery and jinns

Sorcery essential purpose is to block people's life: work, money, marriage, having children, studies, etc. and health problems are collateral consequences, but it happens that the health is the target. Besides that, sorcery causes specific dreams allowing certainty in diagnostic:

Pursuit = blockage

Dog, soldiers = jinns

Bull, being aggressed = magicians

Snake = jinn, magician or sorcery made with knots

Water = sorcery in water

Going up, going down, seeing yourself up, falling= sorcery put up
